# ARTOME

One Device. Any Space.

We're Not Following the Future. We're Building It.

The way we learn, present, and collaborate has changed forever, yet traditional AV systems remain fixed, complex, and restrictive. We set out to change that.

Artome was created to bring freedom and flexibility back to technology. One innovative, mobile solution that delivers high-quality audio and visuals anywhere, without complex installations, construction, or limitations. From classrooms to boardrooms, auditoriums to hybrid workspaces, Artome transforms any space into a fully equipped, future-ready experience.

Artome S1 / S2

S1 and S2 are installation-free AV solutions that turn any space for learning, with S2 adding hybrid and advanced audio for multipurpose use.

Artome M10

An installation-free AV solution with hybrid capability and advanced audio for multipurpose use, all in award-winning Nordic design.

Artome X20

Compatible Epson projectors
EB-PU1006 / EB-PU1007 / EB-PU1008 / EB-PU2010 / EB-PQ2008 / EB-PQ2010

MULTIUSE
LARGER SPACES

FUTURE PROOF

Artome Connect App

With the Artome Connect app, you can fine-tune audio, manage security settings, and customize connections to suit your environment. Easily keep your device software up to date for optimal performance and new features. Download Artome Connect from the App Store or Google Play.

More Than a Cart

Connect microphones, a laptop, and a webcam for a complete solution that supports both in-room and remote presentations. Built-in rack space allows easy integration of wireless receivers, casting devices, or other AV equipment.
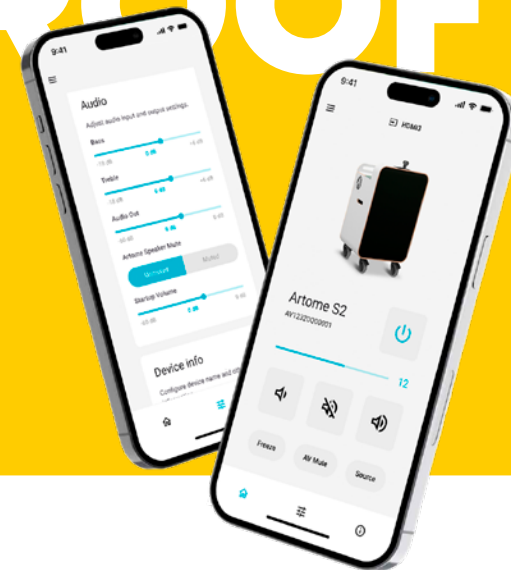

Lock it. No surprises.

We know that users mean well, but a curious hand can quickly mess up a carefully constructed AV setup. That's why Artome has a lockable front door that protects your settings exactly as they were intended. Safe, simple, and out of reach of fingers.

DSP Settings via Artome Connect App

Bass and Treble
Bass level controls bass frequencies. Treble level controls higher frequencies. Use the sliders to adjust the audio to desired level.

Max Volume
Set maximum speaker volume level for Artome unit.

Aux In Volume
Aux in level controls the volume of the unbalanced audio. This setting is available for devices with aux in connector.

Input Gain (Line-in mode)
Adjusts the sensitivity of the XLR inputs.

Mic/Line Selector
This setting allows selecting whether the Mic inputs work on mic or line level. When line level is selected, an additional input gain control appears.

Hybridock USB Out
Adjusts the Hybridock USB Out Level for videoconferencing.

Speaker Mute
This setting allows disabling Artome internal speakers when an external PA system is used.

Audio Out Volume
Audio out level controls the output volume of audio out connectors.

Internal Connections

HDMI
Audio and video input

ARTOME+*
Interface between video conferencing devices and a computer

USB*
Connect or power external USB devices, or play audio via compatible USB sources.

MIC 1 & 2 (XLR)
Connection wired or wireless microphones. Can be switched to Line mode.

AUDIO OUT L & R*
Audio output for external speakers (balanced stereo 0 dBV)

POWER
Power supply for periferials

* Not included in Artome S1

External Connections

HDMI
Audio and video input

AUX
Unbalanced audio input.

2 x Custom D-type slots
For optional internal connections that can be routed to the back plate when needed.

Back panel not included with X20
